FPS™ Aquarian™ Product Safety Notice

For: **Probe/Sensor/Electrode**

P/N 9300-0002

For use with: Aquarian™ 3000, Aquarian™ 3000Mini, Aquarian™ 1000Plus and Single Probe Alarm Systems

Fossil Aquarian™ Drum Level detection systems are FPS™ engineered products for use in the safety critical function of water/steam level detection on boilers and other pressure vessel units with operating pressures/temperature up to 3000psig @ 1200°F. Aquarian™ systems are designed, fabricated and tested in accordance with **ASME Boiler and Pressure Vessel Code (An International Code)** and **only** manufactured at our factory in Canada. The Aquarian™ products carry various industry approvals from agencies such as CSA, CRN, FM and PED.

It is important for end users of these products to be aware that in order to maintain the above mentioned industry approvals, **only** original spare parts manufactured by FPS™ can be used on these safety critical systems, the use of parts from other manufacturers voids any industry approval.

FPS™ cannot verify that parts from other manufactures will fit our systems without causing permanent damage to the system and/or function properly with the Aquarian™ electronics, to detect the water/steam level accurately. Note that any damage to the products that is a result of using non FPS™ parts voids the FPS warranty for the product.

Given the critical role that the FPS™ Drum Level Detection systems play in protecting your plant equipment from catastrophic failure which could result in personal injury or death it is imperative that only authentic FPS™ spare parts are installed by qualified maintenance personnel in accordance with FPS™ instruction manuals.

Aquarian™ Level Detection systems and spare parts are sold only through FPS™ or one of our authorized sales representatives. For information related to the authorized sales representative for your area, recommended spare parts, maintenance schedules and maintenance instructions please contact FPS™ at sales@fossil.ca or **1 902 468 2743**.

Genuine Aquarian™ Probe P/N 9300-0002 Rated for 3000psi (207barg) @ 1200°F (649°C)
